Call for Applications

The Association of State Dam Safety Officials (ASDSO) is calling for applications from college student design teams to construct a dam model (tabletop size) based on the criteria discussed below and at DamSafety.org/DamModel. University student groups, student branches of professional organizations, or other students interested in dam safety are encouraged to apply.

Application Requirements

- Team Member Names and Affiliations
- Team Leader and Co-Leader (if used)
- Technical Advisor to Team (if used)
- Sketch(es) of proposed dam model and description of major components
- Proposed budget to build the dam (not to exceed \$500)
- Schedule for model development (must show model completion by May 1, 2020)
- Plans for use of the model after it is built. Special consideration given to unique uses (e.g., children's museums, schools, etc.)

Selection Criteria

- Completeness of application (based on requirements above)
- Unique aspects of proposed model (e.g., dambreak, hydropower, gated spillways, rainfall-runoff, etc.)
- Technical merit
- Budget and schedule
- Plans for the model to promote dam safety in the community

Winning Prize

Based on the selection criteria above, one team will be selected to receive the following:

- Funding to build the model on the schedule provided
- Complimentary full conference registration for up to 2 team members at the ASDSO Regional Conference
- \$500 honorarium to team
- Travel and accommodations covered for up to 2 team members at the ASDSO Regional Conference
- Invitation to present model as a "lightning talk" at ASDSO Regional Conference. Ground shipping of model to and from conference is included.

Contact

If you have questions please visit DamSafety.org/DamModel or contact Ben Webster, P.E., at ben.webster@stantec.com or by calling (859) 422-3192.
