

Emergency Action Plan Field Guide

Dustin Walsh, Valdez International Corporation (Contracting with the Bureau of Indian Affairs)

Dozens of dam on Tribal lands are located in rural areas without access to internet or cellular phone reception. In addition, Emergency Action Plans (EAP) can be tedious documents to carry out in the field. We've created an Emergency Action Plan Field Guide to supplement the EAP when the Dam Operator's are in the field and need guidance. This is not meant to replace an online EAP or EAP type dashboard, rather to add an additional way of obtaining the critical information from the EAP when in rural areas.
