

## Association of State Dam Safety Officials

### Dam Safety Research: Request for Information on Current Research

On behalf of FEMA, The Association of State Dam Safety Officials (ASDSO) is seeking information on proposed, current, and recently completed cutting-edge research projects from state programs, engineering consulting firms, research groups, academics, and others who have conducted research projects on dam safety issues. Cutting-edge research advances the state of practice for national priorities and the areas of dam risk research and management. The information you provide will be used to add entries to ASDSO's R&D Database. The database is available at <https://damsafety.org/rd/search>.

**NOTE:** R&D Database entries are related to the research projects themselves and not final products or 'associated publications' such as journal articles or conference papers. This distinction is important because one project might have multiple papers associated with it. If you would like to include information about an associated publication, please provide the relevant information at the end of this form. Associated publications will be added to ASDSO's Resource Database and linked to the R&D database entry.

Please contact Katelyn Riley with completed forms or questions at [KRiley@Damsafety.org](mailto:KRiley@Damsafety.org).

## Organization/Agency

Enter the names of the organization(s) conducting the research, and any funding organizations if applicable.

---

## Research Status

Completed

Ongoing

Proposed

---

## Research Start Date

If the research is a proposed project with only an estimated start date, please select the Estimated box.

Estimated

---

## Research End Date

If the research is an ongoing or proposed project with only an estimated end date, please select the Estimated box.

Estimated

---

## Funding Awarded

If there is any funding, in the form of grants or otherwise, associated with the project, please enter the amount here. If there is no associated funding, please leave blank.

\$

## **Associated Publications**

If the research project produced any journal publications, research reports, conference papers, or other such products, please enter citations here. If there is an associated DOI for the publication, please include that information.
